

CO₂ saving of the online event

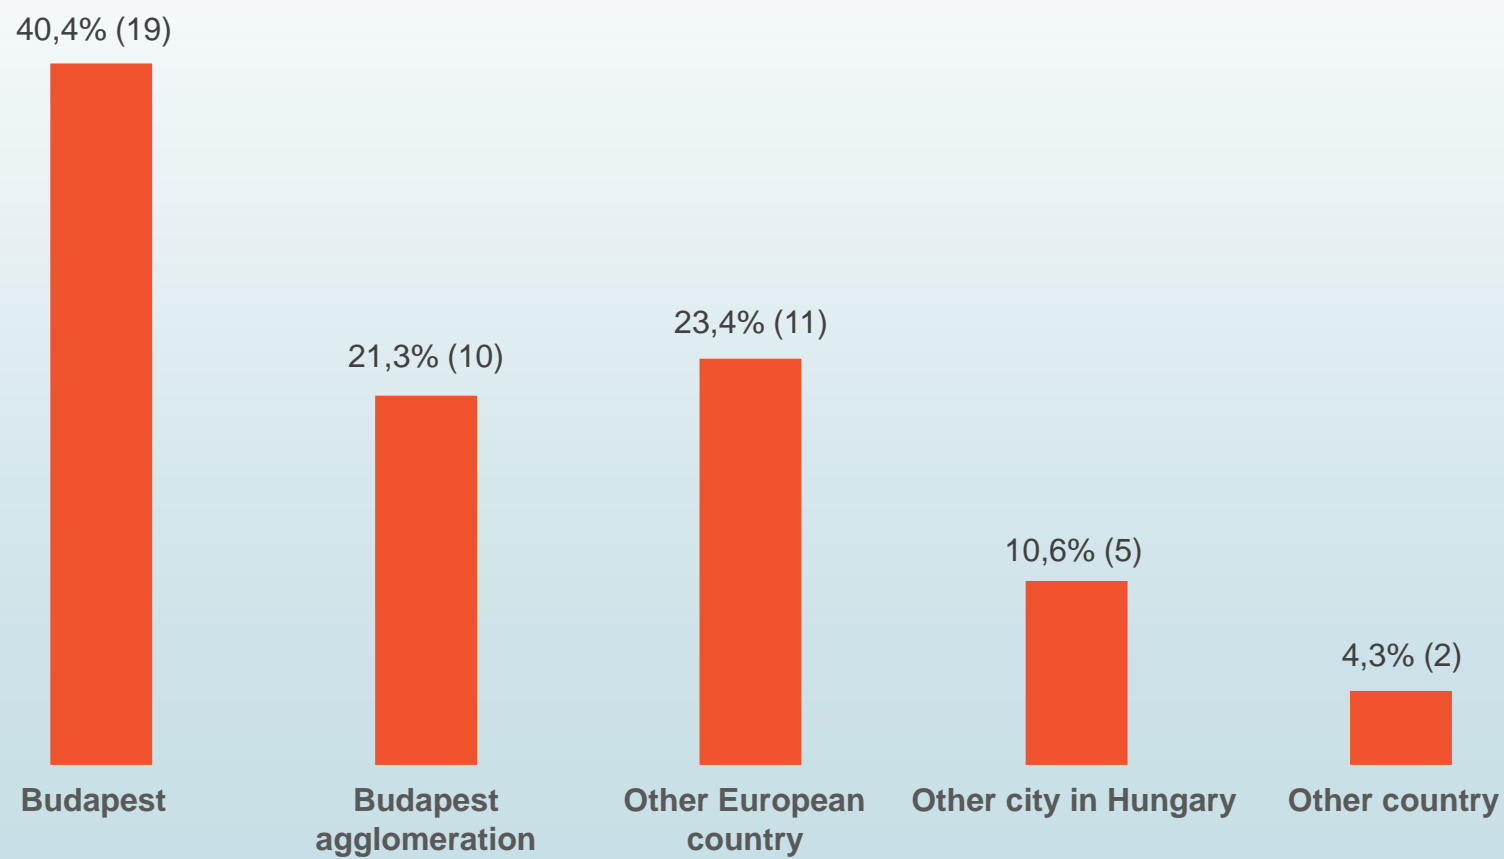

A calculator by Future-Now and Budapest University of Technology and Economics

A dark grey arrow points to the right from the left edge of the slide. Several thin, curved lines in shades of blue and grey originate from the left side and sweep across the slide towards the right.

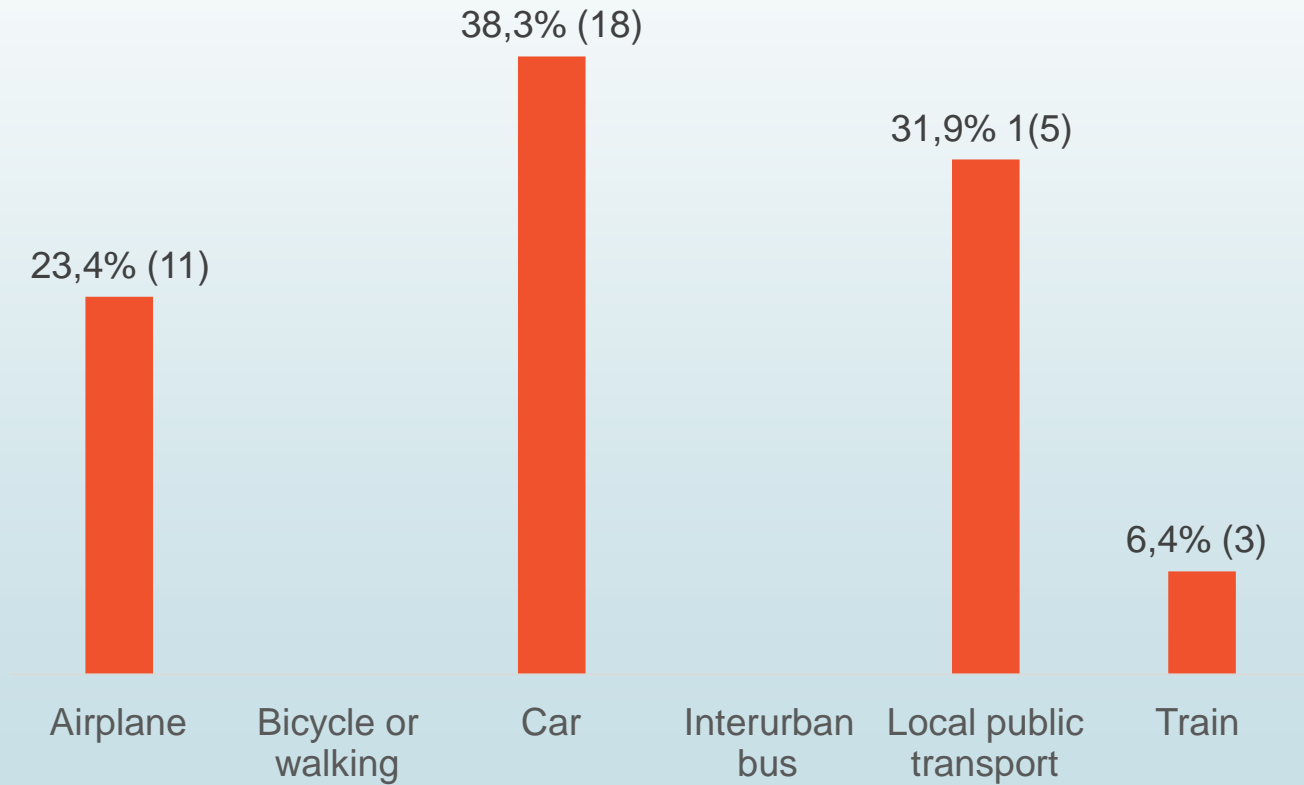

The data

- ▶ 117 attendees joined the conference
- ▶ 50 attendees participated in the poll

City of residence

Chosen mean of transport

The results

- Total CO₂ saved by the 50 people who has participated in the poll:

9858 kg CO₂

- Total CO₂ saved by the whole audience (117 people):

23067 kg CO₂

(Calculating with the whole duration of the event, 10 server hours, 1,19 kg of CO₂ emission by server use)

23067 kg CO₂ - What does that mean?
